

Ergonomic bass harness

The latest version of the bass harness has been developed by an osteopath, Antoine STEPHAN, (drummer of Cap Caval pipe band) and our company. The Bagad of Lann Bihoué has been the first customer to use it.

The bass harness has quick release attachments and an adjustable stand for the bass. The bass height can be easily adjusted. Once you have tried this harness, you will notice immediately the effects. Your posture will be improved and you will be able to move freely.

Benefits of the Pysiodrum harness are :

- Reduced back pressure by 50%
- Better breathing
- Less muscular pains
- More endurance whilst playing
- No nerve compression

Comes in size :

- S (< 1.65m),
- M (1.65m < 1.90m)
- XL (> 1.90m or bigger frame).
